The subject matters of claims 1-10 appear to be novel and to involve an inventive step in view of documents 1-3 cited in the ISR and newly cited document 4. Documents 1-4 do not describe that the control of the action of an extruding means is interlocked with the opening and closing of a cover body that keeps accommodated drugs lined up. Furthermore, the subject matters of claims 1-10 with this constitution exhibit an effect that when the cover body is opened, the drugs can be prevented from protruding from the lined-up state.
